

Appendix

Survey questions

used in the article “Are religious organizations becoming green? Faith communities’ role in advancing environmental sustainability in Switzerland”

For the full questionnaire and the data set, please see:

Senn, Jeremy; Stolz, Jörg; Köhrsen, Jens (2025) „National Congregations Study Switzerland (NCSS) congregational census, waves 1 and 2 (2008–2009, 2020–2021)”, FORS, <https://doi.org/10.48573/6tqz-q565>.

- 1) *Has a process been set in motion that has led to greater environmental awareness in your community/pastoral care unit?*
 - *If yes: If yes, when did this process begin? (YEAR)*
- 2) *Does your community have different waste bins for waste separation (e.g. PET, aluminium, glass, paper, etc.)?*
- 3) *Does your community use green electricity or has it researched green alternatives?*
- 4) *Has your community invested in renewable energy?*
- 5) *Have there been any religious celebrations in the last 24 months that have focused mainly on environmental issues?*
 - *If yes: How often did they take place?*
- 6) *Has your community/pastoral care unit been publicly active in relation to environmental protection in the last 5 years (e.g. participation in public rallies, statements in the media)?*
