Title: Colonization and Spread of Invasive Mosquito Species in Bratislava (Slovakia)

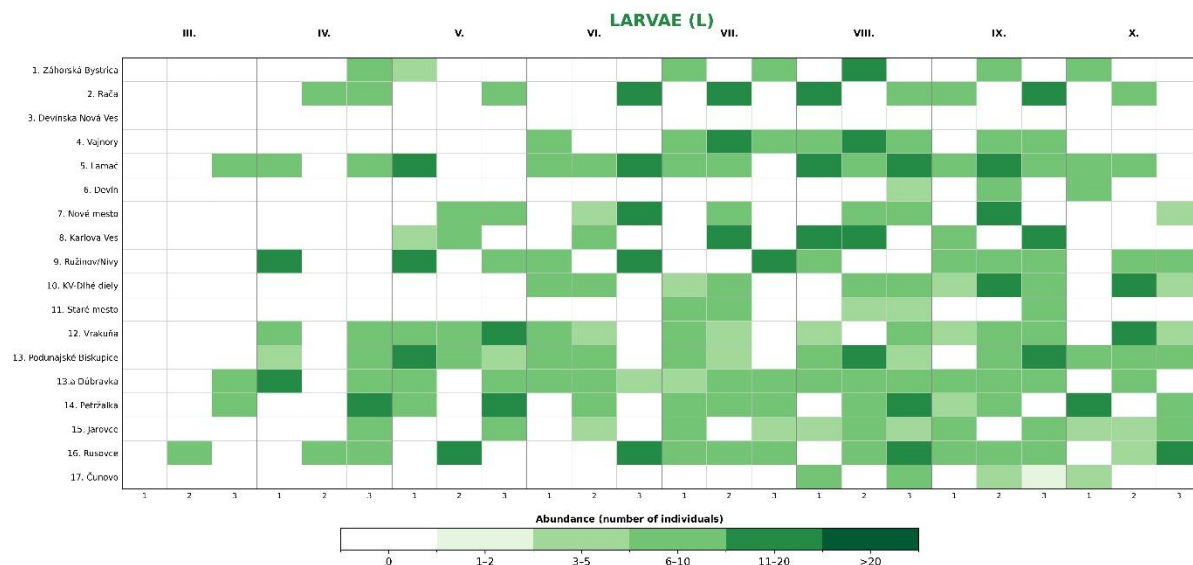

Authors: Nasir Jalili, Miroslava Horniačková, Viktória Hodorová, Jozef Nosek, Ondrej Petrus, Jakub Gécz, Veronika Michalková*

*Corresponding author: veronika.michalkova@savba.sk

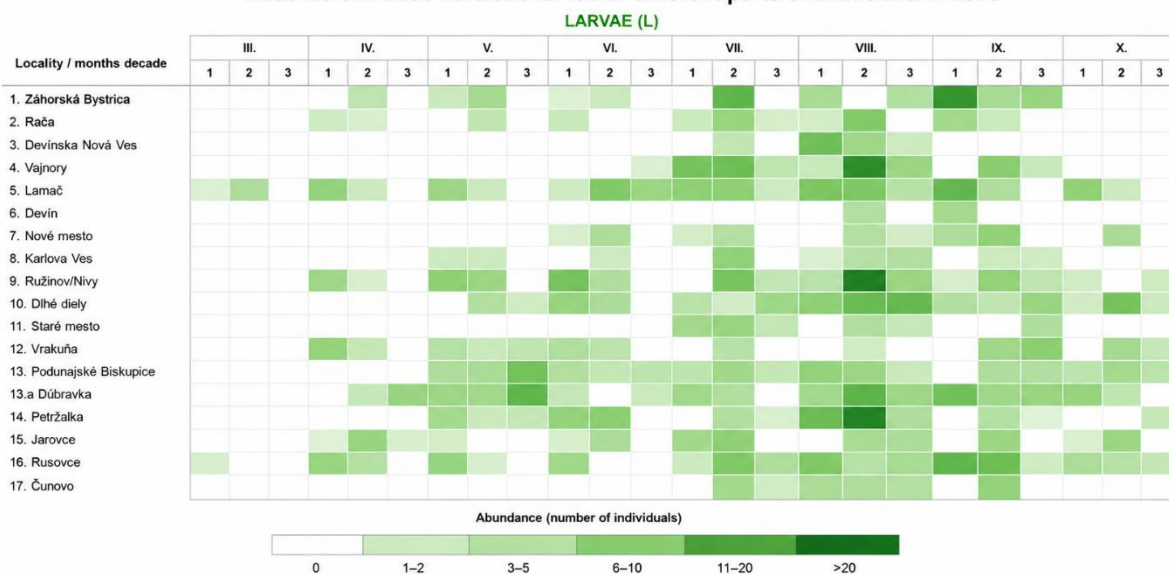

Distribution of *Ae. koreicus* larvae in Bratislava during the studied years

Records of *Aedes koreicus* larvae in different parts of Bratislava in 2024

Records of *Aedes koreicus* larvae in different parts of Bratislava in 2025

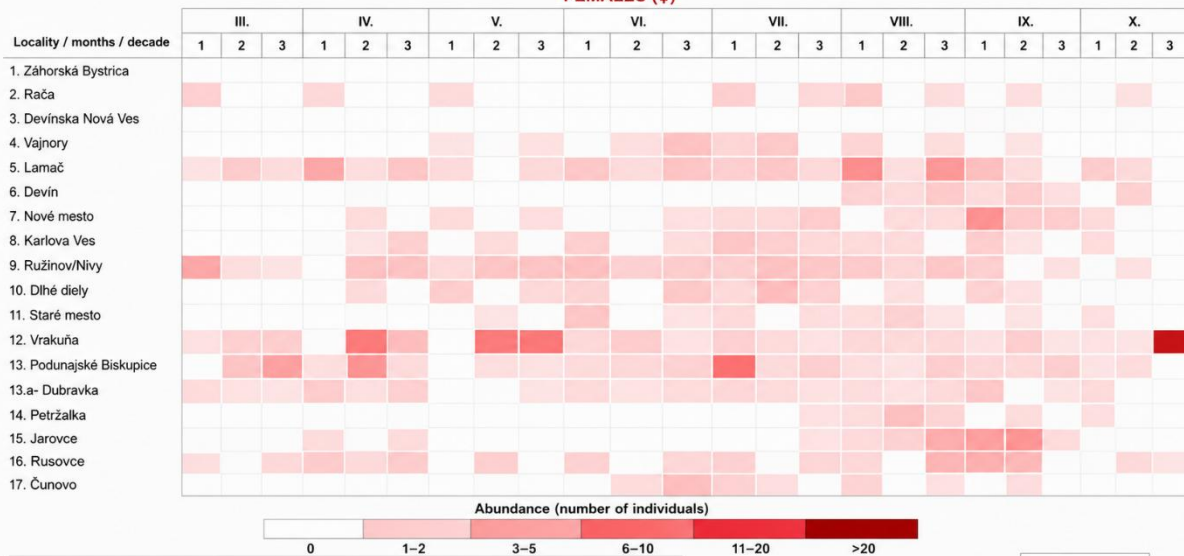

Notes:
Columns show months (III–X) and decades within each month (1 = 1st decade, 2 = 2nd decade, 3 = 3rd decade).
Intensity of color represents abundance (number of individuals).

L = larvae

Records of *Ae. koreicus* females in 2023.

FEMALES (♀)

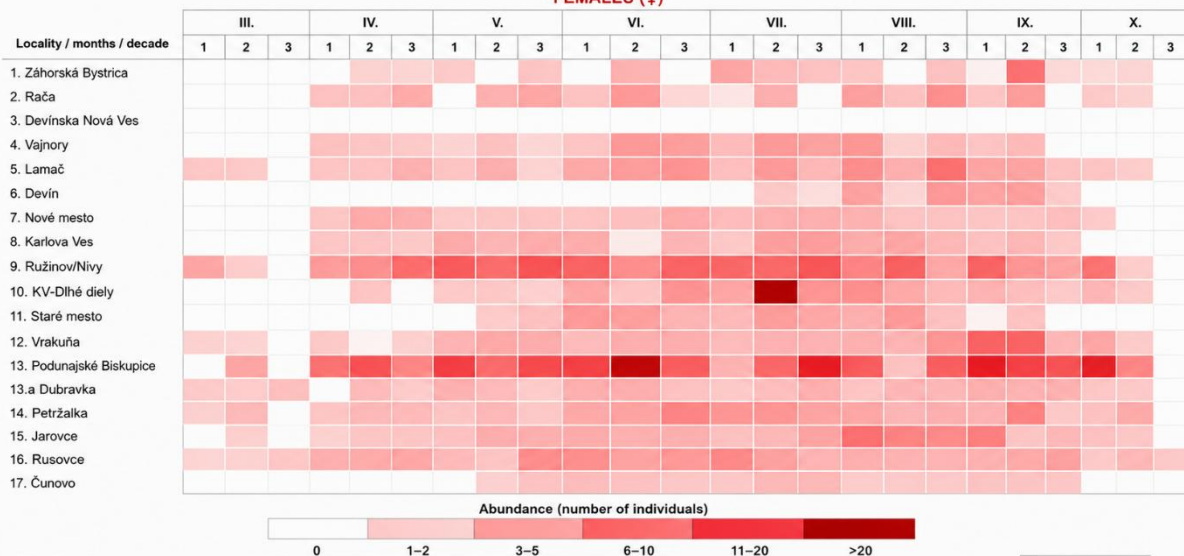

Notes:
Columns show months (III–X) and decades within each month (1 = 1st decade, 2 = 2nd decade, 3 = 3rd decade).
Intensity of color represents abundance (number of individuals).

♀ = females

Finding of *Ae. koreicus* female in 2024.

FEMALES (♀)

Notes:
Columns show months (III–X) and decades within each month (1 = 1st decade, 2 = 2nd decade, 3 = 3rd decade).
Intensity of color represents abundance (number of individuals).

♀ = females

Records of *Ae. koreicus* female in 2025.

FEMALES (♀)
