----	-------------------------------	---

Notes: The limits for language (English) and publication year (2011–2024) were applied to the main search using the filters available in PubMed. The keywords were searched in the title and abstract fields in PubMed (i.e., [Title/Abstract]), title field (i.e., [Title]), and the controlled vocabulary terms are indicated with [Mesh] or as a Major MeSH term [Majr]. Phrases were enclosed in quotation marks to force the searching of the exact terms in order presented. To these results, the search strategy to exclude publication types not of interest as per eligibility criteria was used. No other limits were applied to the searches.
