Dear Elke,

The Animal Welfare Body assessed the work protocol: **"Variability of the ionome of Wild boar (*Sus scrofa*) and Red deer (*Cervus elaphus*) in a Dutch national park, with implications for biomonitoring**, received on **16/01/2023**.

It is the opinion of the AWO that this is not an animal experiment as referred to in the Dutch Act on Animal Experiments, since the experimental procedures described in present protocol will not make use of live animals or animals that were killed for the purpose of tissue sampling.

In any unforeseen circumstances, or intended deviations from the aforementioned protocol, please contact the animal welfare officer.

Yours sincerely,
Dr. Ir. Ing. J.W.M. Arts

Animal Welfare Officer
