Figure S3

Third Network Analysis - Sample mean and bootstrapped mean for each edge connecting the FFMQ facets, DERS dimensions, CS total scores, CSR and USR dimensions of the SCS

Note. Bootstrap-based confidence intervals are depicted in grey areas, illustrating the statistical variability and confidence in the connections between the subscales. CS = Compassion Scale; DERS_A = DERS Awareness; DERS_C = DERS Clarity; DERS_G = DERS Goals; DERS_I = DERS Impulse; DERS_NA = DERS Nonacceptance; DERS_S = DERS Strategies; FFMQ_AA = FFMQ Acting with Awareness; FFMQ_D = FFMQ Describing; FFMQ_NJ = FFMQ Nonjudging; FFMQ_NR = FFMQ Nonreactivity; FFMQ_O = FFMQ Observing; SCS_CSR = Compassionate Self-Responding; SCS_USR = Uncompassionate Self-Responding.
