Title: **A general procedure to identify indicators for evaluation and monitoring of Nature-based Solution projects**

Authors: Anne Rödl; Alessandro Arlati

Table S1: Selected criteria and indicators for the different NbS co-creation phases and their results (Arlati et al. 2020)

Phase	Evaluation object	Criteria	Indicator (example)
Planning/ decision	Process	- Stakeholder involvement - Satisfaction of involved persons - Involved Experts - Speed of agreement	- Number of respective groups - Perceived satisfaction - Number of respective experts - Time taken for planning - Time taken for decision
	Result	- Suitable to solve the challenges - Feasibility - Fit to the budget	- Number of challenges addressed by NBS - All parts of the plan clear and technical feasible - The budget is not overrun
Implementation	Process	- Stakeholder involvement - Satisfaction of involved persons - Time compliance - Budget compliance	- Number of respective groups - Perceived satisfaction - Days taken longer than planned - Money spent over the budget
	Result	- Quality	- Stability of construction - Destruction of the house façade - Share of plants that survived after planting
Follow-up	Process	- Status of the façade one year after installation	- Share of surviving plants - Types of surviving plants
	Result	- Improvement of the district - Improvement of biodiversity	- Increased share of green facades - Knowledge of NBS and marketing of successful projects - Job opportunities for professionals - Number of indicator species
