

Supplementary Figure 1. Output of IdentiFly software related to classification of a honey bee colony from Cyprus as one of four evolutionary lineages.

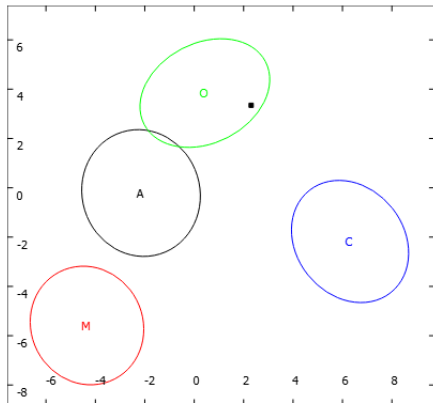

Classification:

id	classified as	probability
colony188	O	0.161296

Probabilities:

id	A	C	M	O
colony188	2.0766539e-10	1.1591794e-08	1.5991982e-17	0.1612958

CVA graph:

CVA scores:

id	CV1	CV2	CV3
colony188	2.305071	3.3468822	1.3199039
