Table S1 Association between INR and sICH

Characteristic	N	Event N	OR	95% CI	p-value
INR (unadjusted)	885	72	1.62	0.60, 3.60	0.250
INR (adjusted)	885	72	1.42	0.39, 3.59	0.513
Characteristic	N	Event N	OR	95% CI	p-value
INR(unadjusted)					
> 1.1	213	26	—	—	
≤ 1.1	672	46	0.53	0.32, 0.89	0.014
INR (adjusted)					
> 1.1	213	26	—	—	
≤ 1.1	672	46	0.61	0.35, 1.06	0.071

OR, odds ratio; CI, confidence interval; INR, international normalized ratio; sICH, symptomatic intracranial haemorrhage.

The model was adjusted for sex, age, hypertension status, atrial fibrillation status, history of anticoagulant use, baseline NIHSS score, baseline ASPECTS, eTICI grade, and onset to puncture.
