Each specific risk factor combination was compared to the same single reference group (aged ≥ 50 years with no other risk factors), while controlling for other variables.

Risk factor combination of interest represented by 14 string risk factor code, with 1s and 0s representing presence or absence of the condition respectively. The order of conditions in the string is as follows: 1) Age ≥ 50 years; 2) Obesity; 3) Diabetes; 4) Hypertension; 5) Heart conditions; 6) Chronic liver disease; 7) Chronic lung disease; 8) Chronic kidney disease; 9 Neurological conditions/ CVD; 10) Immunosuppression; 11) Cancer; 12) Smoking; 13) Mental health conditions; and 14) Not up-to-date on vaccination.

Aged ≥ 50 years with no other risk factors represented by code "1_0_0_0_0_0_0_0_0_0_0_0_0_0_0"
