Table S1 Therapeutic index used. Standard transplantation 1 refers to data dated up until Feb. 2015. Standard transplantation 2 refers to data dated after Feb. 2015. Trough values are presented as ng/ml.			
Time after transplantation (weeks)	Standard transplantation 1 target trough levels	Standard transplantation 2 target trough levels	Immunologic high risk transplantation target trough levels
0-4	12-15	15	15
5-8	10-12	10	10
9-12	8-10	5	5
13-52	5-7	5	5
