

Growth trajectories of wild Assamese macaques (*Macaca assamensis*) determined from parallel laser photogrammetry

Simone Anzà*, Andreas Berghänel, Julia Ostner, Oliver Schülke

* simone.anza@uni-goettingen.de

Highlights:

- Three lasers forming a right isosceles triangle were projected to measure forearm length from digital photos.
- Measurement errors were much lower than variation in forearm length and decreased with object size.
- Females completed 97% of growth by age of first birth effectively desynchronizing growth and reproduction.
- Sexual dimorphism in body size developed from extended growth periods in males rather than increased rates of growth.
- Males dispersed from natal groups years before they completed growth.

This article is part of a thematic collection of articles (Special Issue) of *Mammalian Biology* and covers the following topics and taxa (marked with ☒) addressed in the Special Issue:

Article Type				
☒ Original Research	☒ Techniques	☐ Review	☐ Short Communication	☐ Concept Note
Taxon		Topic		
Terrestrial				
☐ Bats (Order Chiroptera)	☐ Primates : Great Apes (Family Hominidae)	☐ Acoustic ID	☐ Identification techniques	
☐ Carnivores : Bears (Family Ursidae)	☒ Primates : Old World monkeys (Family Cercopithecidae)	☐ Aerial surveys	☒ Life-history	
☐ Carnivores : Canids (Family Canidae)	☐ Ungulates : Bovids (Family Bovidae)	☐ Analytical innovations	☐ Machine learning	
☐ Carnivores : Felids (Family Felidae)	☐ Ungulates : Deers (Family Cervidae)	☐ Automated pattern recognition	☐ Mark-recapture analysis	
☐ Carnivores : Hyenas (Family Hyaenidae)	☐ Ungulates : Giraffes (Family Giraffidae)	☒ Behavioural ecology	☒ Morphometrics	
☐ Carnivores : Mustelids (Family Mustelidae)	☐ Ungulates : Horses (Family Equidae)	☐ Camera-trapping	☐ Network analysis	
☐ Elephants (Family Elephantidae)	☐ Multiple taxa (3 or more Families/Orders)	☐ Conservation management	☒ Photogrammetry	
Marine		☐ Data management	☐ Population ecology	
☐ Baleen whales : Right whales (Family Balaenidae)	☐ Large toothed whales (Families Delphinidae & Hyperoodontidae)	☐ Demographic parameters	☐ Site fidelity & Movement	
☐ Baleen whales : Rorquals (Family Balaenopteridae)	☐ Pinnipeds : True seals (Family Phocidae)	☒ Field methodology	☒ Social ecology	
☐ Carnivores : Bears (Family Ursidae)	☐ Porpoises (Family Phocoenidae)	☐ Genetic ID	☐ Software/Package development	
☐ Carnivores : Mustelids (Family Mustelidae)	☐ Sirenians : Manatees (Family Trichechidae)	☐ Health conditions	☐ Thermal imagery	
☐ Dolphins (Family Delphinidae)	☐ Multiple taxa (3 or more Families/Orders)	☐ Other: (please specify)
