

Supplementary Figure 3. Analysis of differentially expressed genes in disease-susceptible (left panel) and disease-resistant (right panel) pea varieties in response to the infection of *D. pinodella* HNA18. (A) Volcano plots of differentially expressed genes (DEGs) in disease-susceptible pea 043 and disease-resistant pea 086 in response to the infection of *D. pinodella* HNA18 in 8 hpi vs 2 hpi analysis, respectively. (B) Volcano plots of differentially expressed genes (DEGs) in disease-susceptible pea 043 and disease-resistant pea 086 in response to the infection of *D. pinodella* HNA18 in 20 hpi vs 2 hpi analysis, respectively.
