

Supplementary figures

Supplementary figure 6a: The epidermal features of the leaf of *C. arguta* and *C. populnea*.

Supplementary Fig 6b: The epidermal features of the leaf of C. populnea

Supplementary figure 7: Powdered microscopic features of the leaf of *C. populnea* showing (A) Glandular multicellular trichome with many secretory glands and *C. arguta* showing (B) Glandular multicellular trichome with few secretory glands at 400 $\times$ magnification.

Supplementary figure 8: Thin layer chromatographic fingerprint of plant of extracts of (A) *Cissus populnea* and (B) *Cissus arguta*.
