

Supplementary information, Figure S2 Reduced number of adherent cells observed in AHF-CPCs derived from *Cdh2* mutant.

Graphical representation of adherent AHF-CPCs derived from wild type (*AHF-Cre; AHF-GFP; Cdh2^{fl/+}*) and mutant (*AHF-Cre; AHF-GFP; Cdh2^{fl/fl}*) mES cells. Error bars indicate s.d., n = 3 experiments. ** P < 0.02, evaluated by Student's t-test.
