

**Supplementary Figure 7.** Effects of KU-55933 on replicative senescence. BJ cells were cultured until replicative senescence, and these cells were incubated with or without 1  $\mu$ M CGK733 or 10  $\mu$ M KU-55933 for 10 days. The fold increase in cell number over 10 days after compound treatment is presented. The results shown are the average of three experiments, and error bars indicate standard deviations.
