

Supplementary Figures

Supplementary Figure 1 | Charge and discharge curves at 0.5 C showing the state of charge at which both cells were tested. (a) Cell 1 (2.6 Ah) charged and discharged at 1.3 A and was tested under thermal abuse in a fully charged state of 4.2 V; **(b)** similarly Cell 2 (2.2 Ah) shown here to be charged and discharged at 1.1 A was tested under thermal abuse in a fully charged state of 4.2 V.
