

S5 | Species examined and histological methods used in Sherrington's box of slides

Species examined:

- Cat
- Cockatoo
- Duck
- Elephant
- Frog
- Guinea pig
- Hedgehog
- Human
- Monkey
- Newt
- Ox
- Pigeon
- Rabbit
- Salamander
- Torpedo fish
- Tortoise

Methods used:

- Alzheimer's method
- Bielchowski silver stain
- Cajal stain
- Chresyl violet
- Chromic acid and carmine
- Golgi impregnation (silver chromate staining)
- Osmium
- Pyridine silver
- Toluidine blue
- Van Gieson (Aqueous sol. of Picric Acid added Acid Fuchsin)
- Wallerian degeneration to identify pathways
- Weigert Pal
