Hey 陈刚,

When you find a CC licensed work that you wish to reuse, simply read the license and comply with those terms. We have more than one license so be sure to do your due diligence to find out which one is on the work you wish to reuse.

For instance, say you wanted to use this image of [my cat](#). You can view the license by clicking on "Some Rights Reserved" -- you can read there that all you must do is give me credit and you have permission to reuse the image.

Here are some tips for giving credit: https://wiki.creativecommons.org/wiki/Best_practices_for_attribution

Hope this helps!

Mari

Dear Sir/Madam,

I am writing to request for the reprint permission of reusing some figures published in Scientific Reports. We have one review article to be published in Light: science & applications. In the review article, we reused some of the figures published in Scientific Reports as listed below.

We also sending you the information of the authors' information of the review article

The requesters' names: Gang Chen¹, Zhongquan Wen¹ and Cheng-Wei Qiu^{2*}

¹College of Optoelectronics Engineering, Chongqing University, 174 Shangzheng Street, Chongqing 400044, China

gchen1@cqu.edu.cn, wenzq@cqu.edu.cn

²Department of Electrical and Computer Engineering, National University of Singapore, 4 Engineering Drive 3, Singapore 117583, Singapore

Correspondence: Cheng-Wei Qiu(eleqc@nus.edu.sg)

Could you please send us the reprint permissions of following figures as soon as possible, since we only have 9 days before the deadline of revision submission.

Thanks a lot!

1、Title:Super-oscillatory focusing of circularly polarized light by ultralong focal length planar lens based on binary amplitude-phase modulation, *Scientific Reports* 6, 29068 (2016)

Figures: Fig. 3, Fig. 4a, Fig. 4b and Fig. 4c

2、Title:Generation of a sub-diffraction hollow ring by shaping an azimuthally polarized wave, *Scientific Reports* 6, 37776(2016)

Figures: Fig. 4a, Fig. 6b and Fig. 6c

3.Title:Creation of Sub-diffraction Longitudinally Polarized Spot by Focusing Radially Polarized Light with Binary Phase Lens, *Scientific Reports* 6, 38859(2016)

Figures: Fig. 5a, Fig. 6a and Fig. 6b

4:Title Super-resolution optical telescopes with local light diffraction shrinkage, *Scientific Reports* 5, 18485(2015)

Figures: Fig. 1a, Fig. 4a, Fig. 4b and Fig. 4c

If further information is required, please let me know.

I am Looking forward to your reply.

Regards!

Sincerely

Gang Chen, PhD, Professor (PhD Advisor), Director
