

Supplemental Figure 8

Supplemental Figure 8: *SNHG8* reduces PABP-positive stress granules. HEK293-T cells were transfected with WT-Tau-GFP or P301L-Tau-GFP under basal conditions. A. Immunostaining for PABP protein. PABP (red), GFP (green), and DAPI (blue). B- C. Bar graphs showing quantification of cells with stress granules as a percentage (B) and the number of stress granules per cell (C). D. PABP intensity. Scale, 5μm, *p<0.05.
