

Supplementary figure 4: Alignment and phasing of reads for *CYP2D6* (A), *VKORC1* (B), *DPYD* (C), *CYP2C19* (D), *CYP2B6* (E) and the *CYP3A* locus (F). Allele 1 and 2 indicate the phased reads. Reads in allele X could not be mapped to either one of the alleles. Reads were aligned to GRCh38.
