

Supplementary Figure 2. Visualization of the energy landscape by *APOE4* and *APOE2* information
 LOAD frequency and *APOE4* frequency were significantly correlated, with a higher correlation coefficient in group 1 (Kendall's $\tau = 0.48$, $p = 6.72 \times 10^{-7}$) than in group 2 (Kendall's $\tau = 0.41$, $p = 1.59 \times 10^{-6}$).
