

Supplementary Files-Supplementary Figure S1

Supplementary Figure S1. Densitometry of the Western blots of phosphorylated Smad2/3 (p-Smad2/3), total Smad (t-Smad2/3), αSMA and FN in human cardiofibroblasts and ECM FN deposition by these cells as shown in **Figure 4a**. GAPDH was used as the equal loading control. Lane 1: Control treatment; Lane 2: TGFβ1 treatment at 1ng/ml; and Lane 3: TGFβ1 (1ng/ml) + 1-155 (2.5μM). Data are the means ± S.D. from 3 separate experiments. *, p<0.05.
