

Supplementary Files-Supplementary Figure S3

Supplementary Figure S3. Densitometry of the Western blots of ECM TG2, cell surface (CS) TG2 and total TG2 (tTG2) in human cardiofibroblasts as shown in **Figure 4b**. GAPDH was used as the equal loading control. Lane 1: Control; Lane 2: TGFβ1 treatment at 1ng/ml; and Lane 3: TGFβ1 (1ng/ml) + 1-155 (2.5μM). Data are the means ± S.D. from 3 separate experiments. *, $p < 0.05$.
