

Supplementary Figure S2. a HMEC-RAS-ZEB1 cells depleted of TBL1 displayed a decreased mesenchymal-like morphology. Phase-contrast images of HMEC-RAS-ZEB1 cells transfected with the indicated siRNAs versus HMEC-RAS cells. **b** Depletion of TBL1 causes derepression of epithelial genes. *CXADR* and *CLDN12* mRNA expression levels were analyzed by RT-qPCR in HMEC-RAS-ZEB1 cells 72 hours after transfection with siTBL1, siZEB1 or both siRNAs together. Data are the average of $n = 6$ data from three independent experiments $\pm$ SD.
