Hello,

Thank you for your email.

I understand your situation, but I do not think the *authorship* of a paper should be decided ultimately by the policies of an institution with respect to their email accounts! I would think that if you communicated with the Editor directly, to explain this situation, they would understand and be able to add an author name manually, without requiring the email address.

Regarding the addition of the other authors, I am of course fully in support, as I understand how their assistance was required to complete this fine work.

Respectfully,
Jeffrey Keillor

Subject: RE: Your response is NEEDED

Attention : courriel externe | external email

Dear Jeff,

Thank you for reminding me about this point. The issue is that the journal requires an active email address in the online submission system. In previous submissions to other journals, I was suggested

to add a memorial for Kojima-sensei in the acknowledgements or as a footnote in the manuscript. Initially, I thought that Cell Death & Disease would allow for a different author list in the article file and the online submission system since they did not mention this in our original submission... However, I will contact the journal again to explain this situation.

Another reason for the confirmation of authorship is needed is because new authors were added to prepare the revised manuscript.

Best regards,
Xian-Yang

Hello,

I don't understand why the journal would ask you to remove the name of Soichi Kojima.

If he was involved in the intellectual framework of this specific study, and contributed to the design of experiments for this specific study, he should be listed as an author. (If someone leaves my group, and their work is published many years later, they are still listed as a co-author.) Surely this is something that we can justify to the journal.

On the other hand, if he had nothing to do with this study, and it was conceived, initiated and completed after his untimely passing, then I can understand removing his name.

Xian-Yang, I think you are in the best position to discern between these two scenarios, and I will approve your decision. I just want to remind you that it is not the journal that decides, it is the authors.

Thank you,
Jeffrey Keillor
