Expressed as the percentage of folded protein normalized uppon the three first temperatures of the T° range

CETSA TUBB – Statistical testing

EC50 T°

EC50 has been estimated manually by drawing the graphs, fitting linear regressin model and reporting the T° at 50% folded protein

EC50 (T°)	NT	PACLI	EAPB
	58,5	63,8	64,2
	59,3		63,1
	58,7	63	61,2
	59,5	63,7	63

Statistical testing :

Normal distrubution		
Untreatd	shapiro.test(c(58.5,59.3,58.7,59.5))	**p=0.4877**
Paclitaxel	shapiro.test(c(63.8,63,63.7))	**p=0.2196**
EAPB02303	shapiro.test(c(64.2,63.1,61.2,63))	**p=0,6152**
Variance		
Untreatd vs Paclitaxel	var.test(c(58.5,59.3,58.7,59.5),c(63.8,63,63.7))	p=0,974
Untreated vs EAPB02303	var.test(c(58.5,59.3,58.7,59.5),c(64.2,63.1,61.2,63))	p=0,1496
Student		
Untreated vs EAPB02303	t.test(c(58.5,59.3,58.7,59.5),c(64.2,63.1,61.2,63),var.equal=TRUE,alternative="two.sided")	p = 0.001124315602624.
Untreated vs Paclitaxel	t.test(c(58.5,59.3,58.7,59.5),c(63.8,63,63.7),var.equal=TRUE,alternative="two.sided")	p = 7.5132863729267E-5

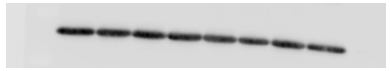
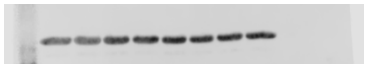
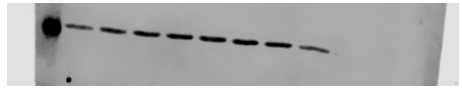
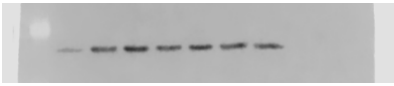
GAPDH

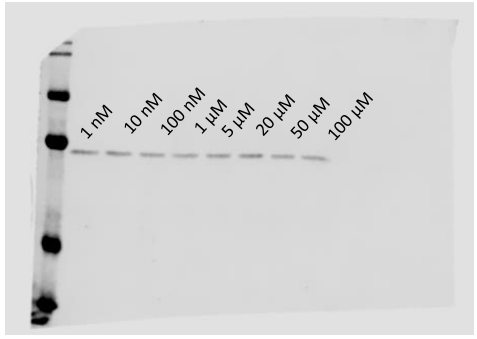


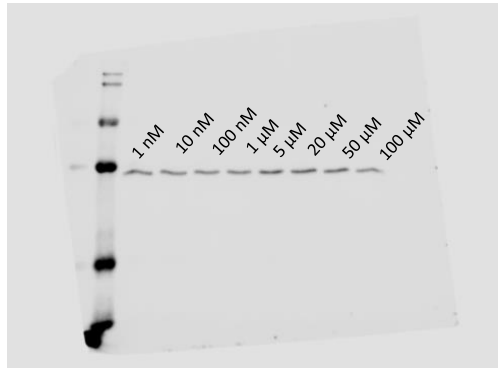


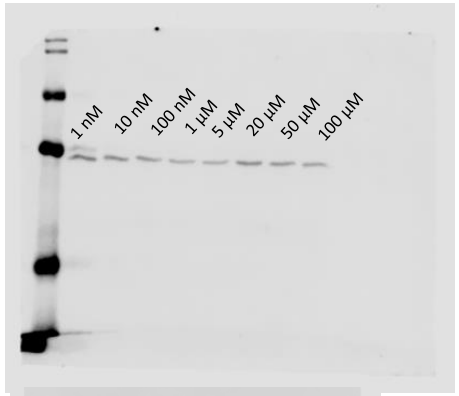




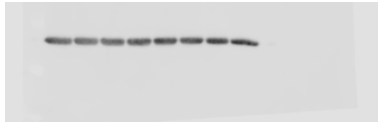
EAPB02303

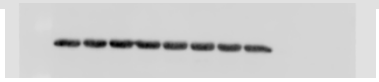






GAPDH





ITDR CETSA TUBB – Quantification and EC50 determination for EAPB04303

EAPB04303	Signal				
	n1	*n2*	*n3*	*n4*	*n5*
1 nM	11,2	45,0	23,8	removed	removed
10 nM	16,7	40,2	16,9	7,5	10,3
100 nM	18,5	23,5	11,7	1,6	11,2
1 µM	37,3	63,9	27,9	21,6	59,4
5µM	85,0	85,7	32,5	58,8	97,8
20 µM	86,9	102,2	106,2	123,4	116,9
50 µM	92,9	99,0	112,8	100,7	83,1
100 µM	107,1	101,0	87,2	99,3	NA
EC50	*1,9*	*1,5*	*5,7*	*5,0*	*1,8*

All values normalized to GAPDH intensity and expressed as percentage of the mean of the two highest concentrations (plateau)
EC50 were determined graphically after plotting of the percentage as a function of concentration

EC50 = 3 ± 2 µM

ITDR CETSA TUBB – Quantification and EC50 determination for EAPB04303

EAPB02303	signal		
	n1	*n2*	*n3*
1 nM	17,8	30,7	16,5
10 nM	16,7	26,2	12,8
100 nM	11,9	23,4	8,6
1 µM	9,5	23,5	6,1
5µM	10,8	30,8	6,6
20 µM	14,4	30,1	13,0
50 µM	9,7	25,1	10,5
100 µM	10,7	15,5	8,8
EC50	*NA*		

All values normalized to GAPDH intensity and expressed as percentage of the mean of the two highest concentrations (plateau)
EC50 were determined graphically after plotting of the percentage as a function of concentration

EC50 impossible to fit
