

Fig. S18

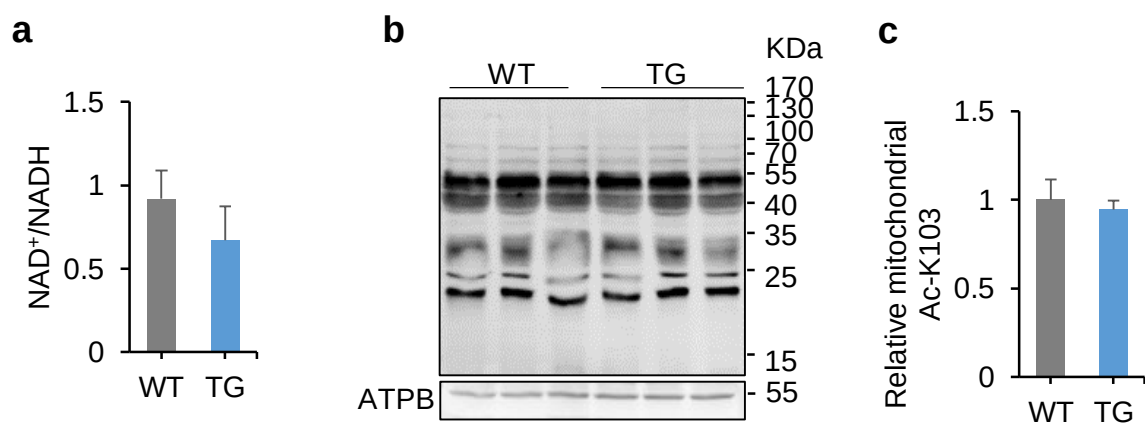

Fig. S18. NAD⁺/NADH ratio and protein acetylation in TG and WT hearts.
(a) NAD⁺/NADH ratio in the TG and WT hearts (mean ± s.e.m.; n = 3 mice per group).
(b) Representative western blots of the acetylome in the TG and WT hearts. ATPB served as the loading control.
(c) Statistics of **(b)** (mean ± s.e.m.; n = 3 mice per group).
