

Supplementary information, Table. S2 | Effects of GLP-2-mediated cAMP accumulation and binding affinity^a.

Receptor	cAMP accumulation		Binding
	pEC ₅₀ ± SEM	E _{max} (% WT ^b)	pIC ₅₀ ± SEM
GLP-2R (1-553) (WT)	10.0 ± 0.04	100	8.5 ± 0.07
GLP-2R (1-490)-LgBiT	9.8 ± 0.1	85.3 ± 4.0*	9.1 ± 0.3

^aAll data were fitted with a three-parameter logistic curve to obtain pEC₅₀ and pIC₅₀ values. Data represent means ± S.E.M. of at least three independent experiments performed duplicate. Statistical significance was determined with a two-tailed Student's *t*-test. *P < 0.05.

^bWT, wild-type.
