

Supplementary information, Fig. S4

Supplementary information, Fig. S4

Supplementary information, Fig. S4 AXL is not co-expressed with ACE2 or TMPRSS2 in human lung and tracheal cells. a-d AXL and (a, c) ACE2 or TMPRSS2 (b, d) expression levels in (a, b) lung and (c, d) tracheal cells were evaluated using the human cell landscape at the single-cell level. Gene expression for each cell type was visualized using tSNE.
