

Supplementary information, Figure S10

Supplementary information Fig. 10: Endogenous acid β -gal staining of kidneys and salivary glands and the apoptosis and proliferation detection after SSK1 treatment.

a, b Representative images of co-immunofluorescence staining of EpCAM with endogenous acid β -gal staining in kidneys (**a**) and salivary glands (**b**). Scale bars, 200 μ m. **c** Representative images of Ki67 staining of kidneys after vehicle or SSK1 treatment. Scale bars, 200 μ m. **d** Representative images of TUNEL apoptosis staining of kidneys after vehicle or SSK1 treatment. Scale bars, 200 μ m.
