

Fig. S3 Analysis of autosomal SNPs and INDELs in the ChinaMAP. **a** The ratios of transition to transversion (Ti/Tv) of autosomal SNPs identified in different provinces and geographical divisions of China. **b** The ratios of heterozygous to homozygous (Het/Hom) of autosomal SNPs identified in different provinces and geographical divisions of China. **c** The number of autosomal singleton SNPs identified in different provinces and geographical divisions of China. **d** The number of autosomal singleton INDELs identified in different provinces and geographical divisions of China. **e** The ratios of transition to transversion (Ti/Tv) of autosomal SNPs, ratio of heterozygous to homozygous (Het/Hom) of autosomal SNPs, number of autosomal singleton SNPs and INDELs identified in ethnic groups. **f** The number of autosomal singleton SNPs and INDELs identified in related and unrelated participants.
