

Fig. S6

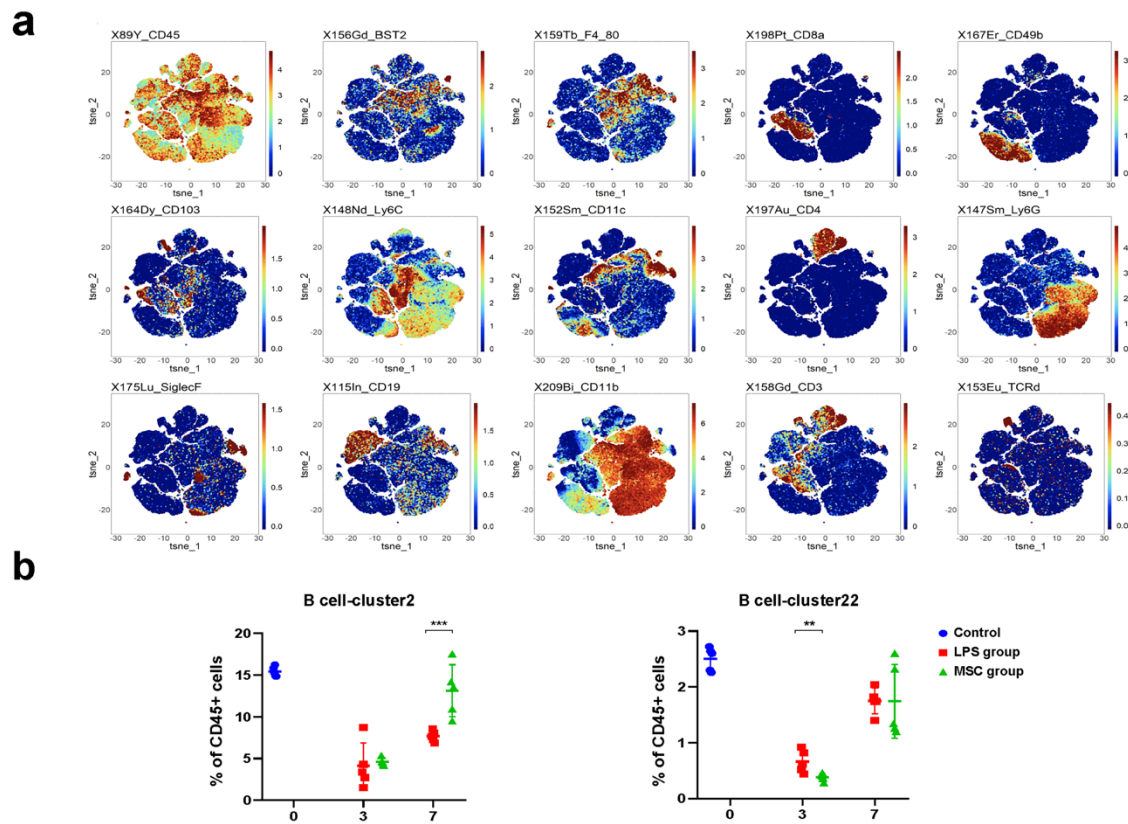

Fig. S6 Immune-Cell Markers and Proportions of B-Cell Subsets in LPS-treated and MSC-LPS-treated Mouse Lung. a viSNE map indicating the relative expression of each marker. **b** Percentages of B-cell subsets over time in LPS-treated and MSC-LPS-treated mouse lung. The data represent the mean $\pm$ SD. The p-values were determined using the unpaired Student t-test. $**P < 0.01$, $***P < 0.001$. Related to Fig. 5.
