

Supplementary information, Fig. S11 | The composite EM density maps for the central ring scaffold of the *X. laevis* NPC.

a, A side view of the composite EM density map for the central ring scaffold of the *X. laevis* NPC. The CR and the NR are above and below the central IR, respectively. **b**, A central slice of the NPC EM map along the nucleocytoplasmic axis. This view is along the nucleocytoplasmic axis from the cytoplasmic side. This slice includes a portion of the CR, the entire IR, and the entire NR. **c**, A slice of the NPC EM map along the nucleocytoplasmic axis. This slice includes a portion of the IR and the entire NR. **d**, A slice of the NPC EM map along the nucleocytoplasmic axis. This slice includes a portion of the NR.
