

Supplementary Figure 2

a

b

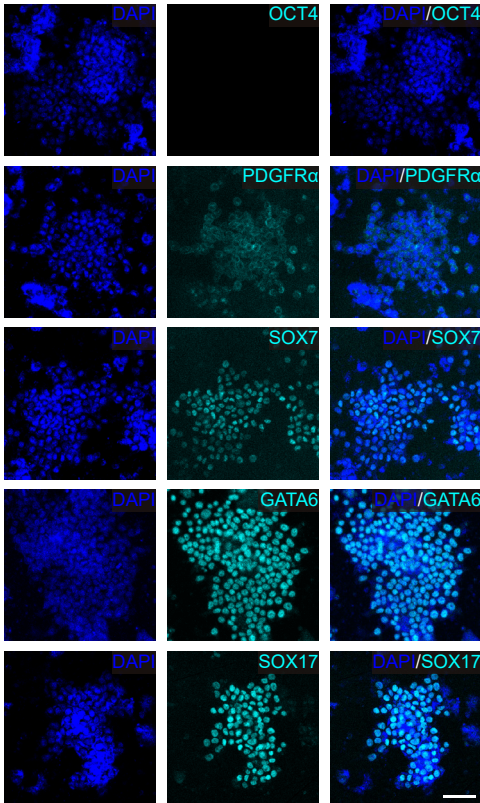

Figure S2. *In vitro* analysis of extraembryonic developmental potentials of TPS cells.

- a. Representative immunofluorescent analysis showing the expression of TS markers (CDX2, EOMES, TFAP2C, SOX2) and pluripotency marker OCT4 in TS-like cells. Scale bar, 50 μ m.
- b. Representative immunofluorescent analysis showing the expression of PE markers (GATA6, PDGFR α , SOX7, SOX17) and pluripotency marker OCT4 in PE-like cells. Scale bar, 50 μ m.
