

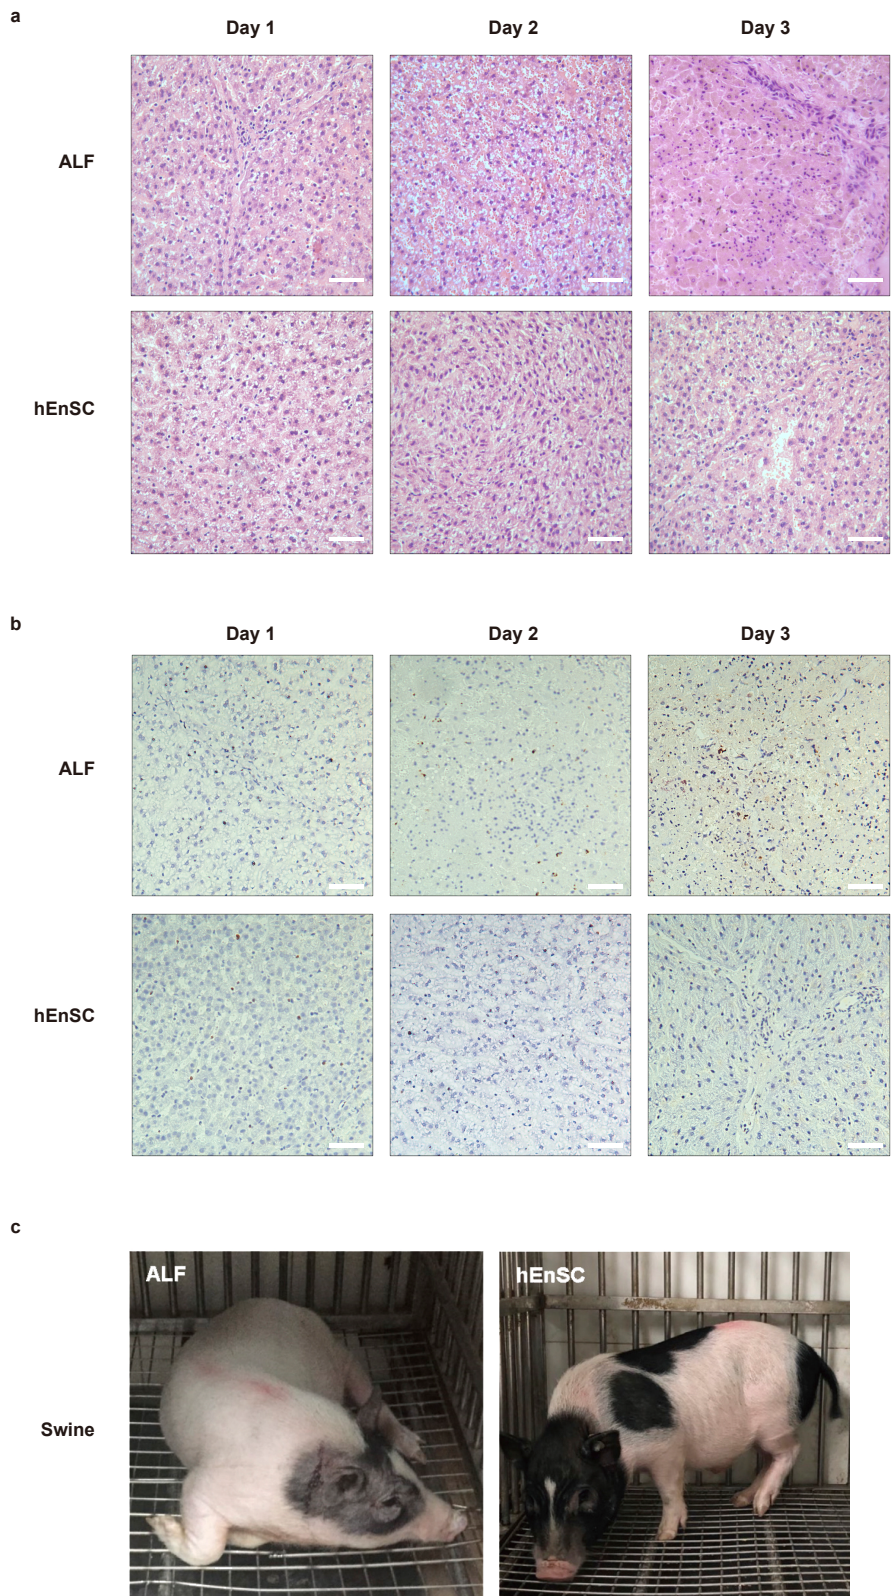

Fig. S5 Histological Analyses on Liver Sections and Behavioral Phenotypes of hEnSC or PBS-transplanted D-GalN-Induced ALF Pigs. Representative images of **a** H&E and **b** TUNEL staining of swine liver sections. Livers were sampled 3 days post D-Gal N administration. ALF: PBS-treated ALF swine group; hEnSC: hEnSC transplanted ALF swine group. Scale bar: 50 μ m. **c** Representative Images of ALF pigs transplanted with hEnSCs (hEnSC) or PBS buffer (ALF). Photos were taken at day 2 post transplantation.
