

Supplementary Table 2: Organisms detected for the 6 fungal organisms identified by culture and whether these were positive by PCR. There were an additional 4 cases that were culture negative, 2/4 positive for PCR alone (both *Cladosporium spp.*) and 2/4 positive for PCR and IVCN (*Aspergillus fumigatus* and *Fusarium spp.*)

Organism	Number of cases	18S rRNA positive	Organism-specific PCR positive	IVCM Positive
<i>Candida dubliniensis</i>	1	1	1	1
<i>Scedosporium spp.</i>	1	0	0	1
Unidentified filamentous fungus	2	0	0	1
<i>Fusarium spp.</i>	1	0	0	0
<i>Acremonium spp.</i>	1	0	0	0

rRNA: ribosomal RNA; PCR: polymerase chain reaction; IVCN: *in vivo* confocal microscopy
