

Supplementary Figure S4. Network of Haplogroups B4, F1, M8, N9, R9.

Networks for the concatenated regions of HVSI at nps 16051 to 16400, and coding regions at nps 8001 to 9000 and 9801 to 10900 were first generated with the minimum reduced algorithm, then using the median-joining algorithm for estimating coalescence time using one site per 8,940 years. Graphic plots were processed with Haploview package version 4.2¹.
