

Description of Additional Supplementary Files

File Name: Supplementary Dataset 1

Description: Binding and BRET data for representative RAF inhibitors. Each inhibitor was tested in a TR-FRET displacement assay using recombinant BRAF kinase domain. BRET EC50 and YMAX are presented for each inhibitor in the following assays: BRAF-BRAF dimerization, KRASG12V-BRAF interaction, BRAFNTR-BRAFKD interaction, and KRASG12V-CRAF interaction. Means and standard deviations from at least three independent repeats are listed.

File Name: Supplementary Dataset 2

Description: Compounds used in this study.
