

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description:

Supplementary data 1: Experimental estimates of the metabolic fluxes for the carbon catabolic core of *E.coli*, wild type in glucose-limited aerobic conditions, at average growth rates $\lambda = 0.1 \text{ h}^{-1}$ (12 experiments, technical replicates) and $\lambda = 0.2 \text{ h}^{-1}$ (7 experiments, technical replicates) collected from the database www.cecafdb.org (Zhang et al. NAR (2014), doi: 10.1093/nar/gku1137)
