

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Node properties for bacterial networks. Includes node-level network statistics (norm_degree and betweenness), network-level statistics (clustering_coeff, clustering_coeff_rand, cluster_ratio), and indicator analysis results for each node (ind [n, d, or c], mean_drought, mean_control, mean_tot, indval, indval_drought, indval_control, p, fold.change, mean.diff, fold.change.log).

File Name: Supplementary Data 2

Description: Node properties for fungal networks. Includes node-level network statistics (norm_degree and betweenness), network-level statistics (clustering_coeff, clustering_coeff_rand, cluster_ratio), and indicator analysis results for each node (ind [n, d, or c], mean_drought, mean_control, mean_tot, indval, indval_drought, indval_control, p, fold.change, mean.diff, fold.change.log).
