

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Fungal compositions at the species level in the fecal samples of CDI and control subjects.

File Name: Supplementary Data 2

Description: Differentially present fungal taxa between healthy controls and CDI subjects via LefSe analysis at the order, family, genus and species levels.

File Name: Supplementary Data 3

Description: Treatment outcome and metadata of CDI patients.

File Name: Supplementary Data 4

Description: Summary of study subjects and sample metadata.

File Name: Supplementary Data 5

Description: Sequence statistics for stool fungal ITS2 sequencing data.

File Name: Supplementary Data 6

Description: Sequence statistics for stool 16S rRNA sequencing data.
