

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: (a) Functional annotation enrichment analysis of the genes containing CpG islands contacted by HBV genome. (b) List of the genes containing CpG islands contacted by HBV genome and used for the analysis

File Name: Supplementary Data 2

Description: Up regulated mRNA identified in RNAseq

File Name: Supplementary Data 3

Description: Down-regulated mRNA identified in RNAseq

File Name: Supplementary Data 4

Description: Up-regulated LNCRNA identified in RNAseq

File Name: Supplementary Data 5

Description: Down-regulated LNCRNA identified in RNAseq
