

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Somatic nonsynonymous mutations identified in liver tumors from high-fat (HF)-fed mice and high-fat-high-cholesterol (HFHC)-fed mice.

File Name: Supplementary Data 2

Description: List of recurrently mutated genes identified in liver tumors from HF-fed mice and HFHC-fed mice.

File Name: Supplementary Data 3

Description: Nine pathways significantly enriched by mutated genes in liver tumors from HFHC-fed mice

File Name: Supplementary Data 4

Description: List of mutated genes identified in liver tumors from HFHC-fed mice and verified in human NASH-HCCs.

File Name: Supplementary Data 5

Description: Genes involved in oxysterol pathways.
