

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Sociability correlations. See separate data file. Zr values for the Pearson correlations (r) on residual values for behavioural scores across 78 breeds for (in separate tabs) correlations between Sociability (Soc) and Playfulness (Play), Aggression – persistent threat (AggrP), Aggression – sudden threat (AggrS), Aggression – distant threat (AggrD), Fearfulness – sudden threat (FearS), Fearfulness – persistent threat (FearP). Given is also Breed, Breed category (Cat, Ancient and Modern), expected correlation direction (Exp_cor), sampling variance (Vz) and sample size (n).

File Name: Supplementary Data 2

Description: Playfulness correlations. See separate data file. Zr values for the Pearson correlations (r) on residual values for behavioural scores across 78 breeds for (in separate tabs) correlations between Playfulness (Play) and Aggression – persistent threat (AggrP), Aggression – sudden threat (AggrS), Aggression – distant threat (AggrD), Fearfulness – sudden threat (FearS), Fearfulness – persistent threat (FearP). Given is also Breed, Breed category (Cat, Ancient and Modern), expected correlation direction (Exp_cor), sampling variance (Vz) and sample size (n).

File Name: Supplementary Data 3

Description: Fearfulness correlations. See separate data file. Zr values for the Pearson correlations (r) on residual values for behavioural scores across 78 breeds for (in separate tabs) correlations between two measures of Fearfulness: Fearfulness – sudden threat (FearS) and Fearfulness – persistent threat (FearP) and three measurements of Aggression: Aggression – persistent threat (AggrP), Aggression – sudden threat (AggrS), Aggression – distant threat (AggrD). Given is also Breed, Breed category (Cat, Ancient and Modern), expected correlation direction (Exp_cor), sampling variance (Vz) and sample size (n).
