

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Significant ART-associated probes in neonates, with annotation, statistics and beta values.

File Name: Supplementary Data 2

Description: Top ART-associated probes in adults, with annotation, statistics and beta values.

File Name: Supplementary Data 3

Description: ART-associated DMRs in neonates, with annotation, statistics and beta values.

File Name: Supplementary Data 4

Description: ART-associated DMRs in adults, with annotation, statistics and beta values.

File Name: Supplementary Data 5

Description: ART-associated probes in neonates with statistics and beta values from the Estill et al. 450K dataset.

File Name: Supplementary Data 6

Description: Common ART-associated DMRs in neonates and adults.

File Name: Supplementary Data 7

Description: Annotation, statistics and beta values of all probes mapped to imprinted regions.
