

Description of Additional Supplementary Files

File Name: Supplementary Movie 1

Description: The movie shows the atomic ball model fits to the average growth island shape as a function of the number of oxidation/reduction cycle (ORC). It contains one fit/image for each single ORC for cycle 1 - 50, one fit/image per five ORCs for cycle 55 – 100, and one fit/image per every 10 ORCs for cycle 110 – 170. For more details on the fit see the section “Methods” in the main text.
