

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: 25 proteins were identified by md-LED as potential interactors with NS1. The enrichment score is shown for individual protein. The confirmed NS1 binders by Co-IP is marked.

File Name: Supplementary Data 2

Description: The raw MiST score outputs are shown for the AP-MS experiments using WT and mutant (D92Y) NS1 as bait.

File Name: Supplementary Data 3

Description: Potential NS1 interactors identified by md-LED, expanded md-LED, AP-MS and the ones reported in literatures are listed.
