

Description of Additional Supplementary Files

Title: Supplementary Data 1

Description: List of MRTF signature genes generated by intersection of SRF target genes by ChIP-seq and genes downregulated with MRTF inhibition by RNA-seq ($\log_2FC < -1$ and $p < 0.05$) in resistant BCC cells. Used in Fig. 2 and Supplementary Fig. 2.

Title: Supplementary Data 2

Description: Intersection of genes downregulated by RNA-seq in resistant BCC cells after treatment with AP-1 inhibitor and ALK5 inhibitor, used in Fig. 4. Significance cutoffs of $\log_2FC < -1$ and adjusted p-value < 0.05 .

Title: Supplementary Data 3

Description: Intersection of genes that are downregulated with AP-1 inhibition ($\log_2FC < -1$ and $p < 0.05$) in resistant BCC cells as measured by RNA-seq, ATAC-seq, and pSmad3 ChIP-seq. Used in Figure 6 and Supplementary Figure 5.
