

Descriptions of Additional Supplementary Files

Supplementary Data 1

Description: Mass-spectrometry data. Proteins identified by mass spectrometry are presented. Proteins that were built into the final model are highlighted in blue. Data were searched against the TAIR *A. thaliana* database and are shown here. Data were that searched against the home-made Brassica (*B. oleracea* var *oleracea*) and database extracted from UniProtKB (Swissprot+TrEMBL) are displayed in the "Brassica" sheet.
