
Title: Supplementary Data 1:

Description: Putative ligands and receptors pairs between the stem and mesenchymal cells.

Title: Supplementary Data 2:

Description: Genes for defining the epithelial, mesenchymal and stemness scores.

Title: Supplementary Data 3:

Description: TFs underwent significant changes along the pseudotime axis of each lineage in Fig 4b.

Title: Supplementary Data 4:

Description: DEGs between Corticotrope1 and Corticotrope2.

Title: Supplementary Data 5:

Description: DEGs between each two of the somatotrope, the lactotrope and the thyrotrope.

Title: Supplementary Data 6:

Description: DEGs between Gonadotrope2 and Gonadotrope4.

Title: Supplementary Data 7:

Description: Cell type-specific DEGs between human and rodent.
